SUMMARY

A full stack engineer with a broad skillset. My greatest strength is that I have a strong foundation across many different tools and languages, coupled with the fact that I learn extremely quickly - this allows me to jump in to any environment and immediately start adding value. I seek out and conquer complex problems to apply what I know and to challenge myself so that I can always be improving. I enjoy learning from my peers and I am always excited to pick up new skills.

EDUCATION

Rutgers University, New Brunswick, NJ
Major: Computer Science
GPA: 3.635
Honors: Cum Laude

Sept 2017 - May 2020

SKILLS

Languages

Proficient with Java, Python, Javascript, HTML, CSS.
Capable with SQL and Bash.

Software

Operating Systems: Windows 10, Linux.
Libraries and Frameworks: React, Jest, Material UI, Node, Express, Flask.
Tools: Postgres, Webpack, AWS (Lambdas, API Gateway, RDS, EC2), Git.

General Knowledge

- Agile Project Management
- Production Deployment and Monitoring
- Object Oriented Programming
- Database Administration
- Full Stack Development
- Microservice and serverless architecture

PROJECTS

Vocabulary Expander

- Developed myself as a personal project.
- Created a web application that takes a text and returns word frequency to identify commonly used words.
- Integrated with a thesaurus API to help find alternatives for overused words.
- Technologies used: HTML, CSS, React, REST API, AWS Lambda, Python.

Barebones Auction Website

- Worked in a group with three other students.
- Created a simple proof of concept for an auction website.
- Led front and back end development by defining coding standards and system architecture.
- Technologies used: HTML, CSS, Java, Javascript, JDBC, JSP, and MySQL.
